QUALITY BORESCOPIES AT GREAT PRICES

## Video Cameras

### Adjustable Focus Video Adapter (P/N FVA3)

The P/N FVA-3 is a focusable video adapter that is compatible with all UXR borescopes- both flexible and rigid. This unit is typically sold in conjunction with our P/N FFVideo-1A Video package or a video camera which is purchased from UXR. As an option, we sell this adapter separately for those customers who wish to provide their own video camera equipment when they purchase a borescope. Note: this is **ONLY** compatible with cameras that have a C or CS type mount- which is an industry standard for industrial cameras. This adapter is not compatible or intended to be used with consumer grade camcorders or digital cameras which are not compatible with borescopes.

Camera Mount	C / CS Mount
Focal Length	16mm, 25mm, 35mm or 40mm * See note 1
Material	Anodized Aluminum and Glass
Focusing	Adjustable
Compatibility	All UXR Borescopes with 32mm eyepiece diameter

Note 1- Focal length is dependent on both CCD chip size and borescope model which it is to be used with. Please provide this information about your camera when ordering.
